## B.M.Fountain Solution

### Technical Sheet

#### ★ REDUCES WASTE ON START UP

B.M.Fountain Solution is especially suitable for older type web presses.

#### ★ CONFORMS TO PRESS SPECIFICATIONS

B.M.Fountain Solution is environmentally friendly

#### Special Qualities

#### Plus Factors

#### Effects

**Can be used with all types of inks and stocks.**

More flexible choice of products.

Wider variety gives more options to be cost effective.

**Compatible with all presses.**

Clean start up at slow speed.

Increases production.  
Less waste.  
More profits.

**Latest anti-corrosion technology.**

Created to meet safety specifications.

Increases press life.  
Less downtime.

**pH of fount conforms to Fogra specification of 5.0 -9.0.**

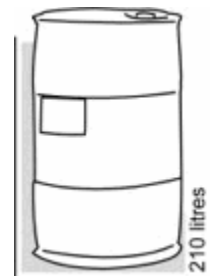

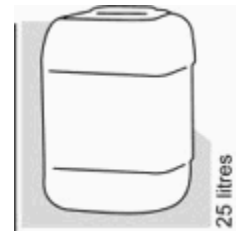

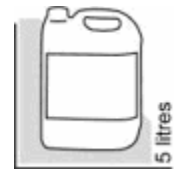

Non corrosive.

Ensures prolonged machine life.  
Healthier press room conditions.  
No restriction on storage.

**Water Based.**

Non hazardous.

Meets health and safety regulations.  
Improves press room conditions.

### Application

An extremely low tension fountain solution normally used in non alcohol applications. However it can be used in conjunction with alcohol if so required.

Preferable working temperature is 10 -20C but it can be run with the press room temperature up to a high of 45C. The conductivity of this product normally is 1500 -1800 ms.

### Usage

Coated stock and high quality paper run at 2% i.e. 20 mls/ litre of water.

Poor quality stock and high temperatures run at 4% i.e. 40 mls/litre of water.
