Innovative products for the printing industry

## BART

### Technical Sheet

★ **Cleans quickly reducing downtime.**

BART gives faster superior cleaning.

★ **Easily removed with water.**

BART can be washed off with water.

#### Special Qualities

**Can be used with all types of inks and stocks.**

**Fast efficient Blanket and Roller Troubleshooter**

#### Plus Factors

More flexible choice of products.

Quicker turnaround  
Eliminates glaze

#### Effects

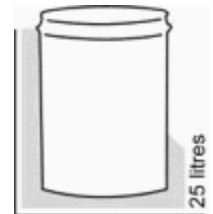

Wider variety gives more options to be cost effective.

Follow through with water for sparkling clean rollers  
Can be used diluted with water to eliminate lint on blankets.

#### Application

This product is excellent for changing colours on all presses. If used on litho presses it has to be followed through with Blanket Wash or mineral turps but on letterpress machines it is not necessary. As its name implies it is a blanket and roller troubleshooter.

#### Usage

For colour changes simply pour onto the rollers and remove until all traces of colour have disappeared. On overnight or weekend stops run BART then follow through with water. Allow to dry overnight for sparkling clean rollers.

Apply on the blanket to rejuvenate and remove paper dust using a wet sponge or cloth. Water will mix freely with the BART and leave hands clean as well as the blankets.
