KombiKleen

Technical Sheet

★ **Ensures faster restart after press stops. Cleaner to use than other conventional methods.**

KombiKleen is user friendly keeping ink from unwanted places including the hands too!

Special Qualities

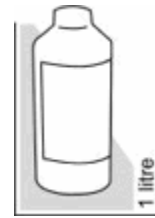

An extremely stable emulsion.

Plus Factors

Easily removes hickeys and lint from image areas.
Increases ink receptivity of the image on all plates but especially CTP and Baked Positive. plates.

Effects

Faster restart.
Longer plate life.
Little or no shaking required before use.

Application

Used in place of Gum Arabic solution this product actually increases the ink receptivity of the image on storage. Especially useful on a baked Positive plate or CTP plates (which have a tendency to go blind on the run) or which can be slow to ink up. This product eliminates the bad habit of using Blanket Wash (Mineral Turps) and Gum Arabic to store the plates. Being user friendly it leaves the water bucket and hands! in a cleaner tidier and safer condition.

Usage

Plate Room.

Use in place of Gum Arabic to protect the plate before going to the press room. Apply with a wet sponge and buff down preferably with a dry cloth.

Press Room.

Use to remove those troublesome marks (hickeys etc.) or paper lint, on the image area of the plate. Simply wipe over the affected area with a sponge, dampened with KombiKleen, and wash away the problems into the water bucket.

For all press stops remove the ink using KombiKleen and a damp sponge, wash away the residue and gum up the plate as normal using KombiKleen.
